

Fast and easy bearing dismounting from housings

## SKF Internal Bearing Puller Kits TMIP series

The SKF TMIP kits are specially designed for dismounting bearings from housings where the fit is on the outer ring.

The combination of unique spring-loaded extractors and an ergonomically designed sliding hammer help enable a safe, fast and easy removal of the bearing. Unlike other internal bearing pullers, the extractors can be correctly positioned in just one quick action.

- Unique design saves dismounting time
- Easy removal of bearings from housings
- Designed to suit a wide range of bearing bore diameters; the selection of extractors is easy
- Puller constructed for optimum strength and durability
- Spring loaded extractors allow quick and easy fitting of the extractor to the inner ring
- Claw design provides a strong and secure grip behind the inner ring, allowing a high puller force to be applied
- Ergonomic sliding hammer enhances user safety
- SKF design, patent pending
